

## Brochure / Leaflet for patients/users

Careforia, the Australian eHealth App has released a new module for Dystonia .

Careforia will help you capture and monitor your symptoms, your activities and how you feel.

Wouldn't it be great for you, your Medical & Allied Health professionals to follow your progress through easily accessible and downloadable graphs?

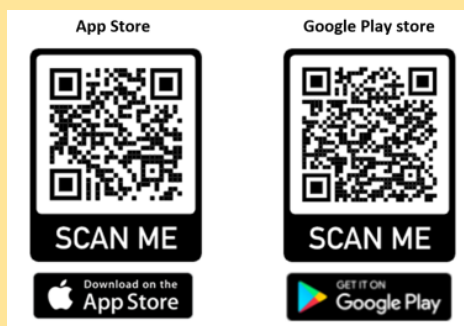

You can personalise your Care Plan to focus on those aspects that are important to you.

You can keep a journal of personal notes and ask for information relevant to your needs.

Careforia is here to assist you on your journey and your virtual personal coach will be available for you every day.

Download Careforia from the App & Play Stores, scan the QR codes.

There is also a web download for those users who have difficulty using their mobile phones. Go to home page in the DNA website below:
