

SEPTEMBER IS DYSTONIA AWARENESS MONTH

Dystonia is a rare neurological movement disorder that makes it difficult for people to control their muscles. It can cause abnormal positions, twisting, spasms, tremors and pain. Dystonia can affect almost any part of the body and can occur in children and adults. There is currently no cure.

Help us raise awareness of this condition during our awareness month. To find out more about dystonia, our activities during September and to download our information brochures please go to our website www.dystonia.org.au
